

小心急性腸胃炎

在炎熱的夏季，容易讓食物孳生細菌，若是吃到不乾淨的食物，就可能引發腸胃炎

急性腸胃炎的嚴重症狀有哪些？

!* 持續發燒，發冷

!* 持續腹瀉超過2天
且每日超過5-6次

!* 血便或黏液便，黑便

!* 嚕吐以致完全無法進食

!* 劇烈腹痛

!* 意識不清

若出現以上這些症狀，應儘速就醫！

Beware acute gastroenteritis

During the hot summer months in Taiwan food can easily become a breeding ground for bacteria and if you consume unclean food it could cause gastroenteritis

What are the severe symptoms of acute gastroenteritis?

A persistent fever and chill

Bloody, mucoid or black stool

Severe abdominal pain

Persistent diarrhea for two days or longer and 5-6 times per day

Severe vomiting leading to an inability to keep down food

Confusion

If you experience any of the above symptoms seek immediate medical treatment
